Link will be sent out prior to meeting
online using starts at 7pm

Guillermo is an engineer, retired businessman and photographer who is a member of the NIH and North Bethesda Camera Clubs.

He graduated as an Engineer in Electronics from Universidad Simón Bolívar, Venezuela in 1976. From 1978 to 1995, he founded several startups in the telecommunications engineering and equipment manufacturing area in Venezuela and one of the first Internet Service providers in the country. From 1990 to 1991 he was part of the team that carried out the privatization and deregulation process of the telecommunications sector in Venezuela. From 1996 to 2002 he worked as the CEO of Movilnet, one of the largest cellular carriers in the country.

Guillermo moved to Maryland in 2002 and started to study digital photography, devoting most of his free time to this activity, while managing a small firm, acquired in 2003. He has more than 10 years of experience shooting and post processing digital images of many kinds of subjects. Currently he does freelance work as a real estate photographer for Home Visit Real Estate Marketing Technologies.

Guillermo has won many awards in club and regional photography competitions, including "Advanced Electronic Images Photographer of the Year 2019-2020" at the North Bethesda Camera Club. One of his images was chosen for publication in Lenswork Magazine's "Our Magnificent Planet 2020" photography book coming out in September 2020.
